---

In case of emergency and we are not able to reach you by phone, who would you like to have us contact and entrust to make any decisions regarding your pet?

Name \_\_\_\_\_

Phone \_\_\_\_\_

Patient health and well being are a priority at McPherson Veterinary Clinic. Our facility is routinely treated for fleas and all animals must be flea free to stay with us. If during your pet's stay we see fleas, or other external parasites, we will administer the proper treatment to keep your pet healthy and happy. Treatment of fleas or other parasites will be at the owner's expense. This policy is so that all animals in our facility are kept comfortable and healthy.

In order to maintain a safe environment for our furry guests, all boarding animals are required to be current on vaccinations. Dogs are required to have Rabies, Dhpp (Distemper/ Parvo) and Bordetella (kennel cough) vaccinations current within the last 12 months. Cats are required to have Rabies and FVRCP (feline Distemper). If your pet has been vaccinated by a licensed veterinarian other than at our facility you will need to bring verification with you prior to or on the day you bring your pet in to board. If your pet is not current on vaccinations we will be happy to administer them when they arrive. These vaccinations will be administered at your expense and you will be required to pay for these when you return to pick up your pet.

We want your pet to have an optimal boarding experience. Please answer the following questions about your furry family member(s) to help us get to know them better.

Does your pet have health concerns that we need to be aware of?

---

---

Has your pet ever had an allergic reaction? YES or NO

If yes, please list what to and what type of reaction your pet has had.

---

Does your pet require a special diet? YES NO If so, what kind?

---

Our guests are fed Hills Science Diet food while they are boarding. If your pet requires a special diet while here, please bring it with you and we will be happy to feed them it. Sometimes, due to environmental changes, animals may get loose stools and we will feed them a high fiber diet during their stay. If your pet has a tendency to have a nervous stomach or stress diarrhea please let us know so we know to start them on this diet when they arrive, before symptoms begin.

Do you have any other behavior or health concerns that you would like to make us aware of?

---

---

*I understand by leaving my pet in McPherson Veterinary Clinic's care, in the case of a medical emergency I entrust them to make medical decisions for my pet. (In the case of an emergency we will do our best to contact you first time permitting)*
